

Are you bored when you see
159th neofetch screenshot
in r/unixporn??
You should be!!

A fetch should be simple program
doing it's job, not a shell script
taking 0.20 second to open
(literally bloat 🤖)

So I made...

susfetch

- Take 0.01 second to open
- Not bloat
- Based (written in C)
- Sus

```
^ /mnt/d/doc/code/susfetch git main !1
```

```
> susfetch -c blue
```

```
usr: sheep
```

```
hst: reibox
```

```
ker: 5.18.11-arch1-1
```

```
mem: 3.3/15.5 GB
```

```
shl: /bin/fish
```

```
upt: 5h 32m 43s
```

```
^ /mnt/d/doc/code/susfetch git main !1
```

```
> susfetch -s
```

```
usr: sheep
```

```
hst: reibox
```

```
ker: 5.18.11-arch1-1
```

```
mem: 3.3/15.5 GB
```

```
shl: /bin/fish
```

```
upt: 5h 32m 45s
```

Crewmate from Amogus
look magnitudes better than
ugly ascii art in neofetch
Don't you think so??
